DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 59-71, 75-80 are drawn to Method of making a microelectronic device, classified in class 438, subclass 122.
- II. Claims 72-74 are drawn to Method for cooling a microelectronic device, classified in class 165, subclass 80.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the method of making a microelectronic device is completely different from the method of cooling a microelectronic device, they do not overlap in scope.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
